(54) Title: A HAND-HELD CAPSULE DEVICE

(57) Abstract: In one aspect, the present invention provides a track (17; 117) adapted for use in a hand-held, capsule-containing device (1; 101) which is adapted to receive a series of capsules (21; 121) therein and defines a conveying path along which the capsules are conveyable. The path includes at least one fold section (23; 123) thereby to provide the path with a space-saving configuration. In another aspect of the present invention there is provided a hand-held device incorporating the track and capsules in the track. The capsules may contain a medicament power.
